

Member Management Solution

Streamline operations with Reveleer's comprehensive Member Management Solution

Member management sits at the foundation of success in value-based care. However, many health plans struggle with siloed data, manual workflows, and rapidly changing regulations. The result is fragmented processes that hinder efficiency and transparency, making it difficult to ensure compliance, manage revenue, and identify opportunities to improve care coordination.

Unified real-time member insights

A unified approach to member management—one that centralizes data, automates workflows, and provides real-time insights—can transform payer operations. By eliminating silos and creating a 360-degree view of members, health plans can make more informed decisions that improve both financial performance and patient outcomes.

Reveleer's solution **automates 90% of the workflow**, streamlining operations by reducing manual intervention

95% of customer interactions are automated, expediting enrollment for all members

With **99.8% submission accuracy**, health plans can ensure revenue recognition while reducing errors

Real-time revenue transparency drives financial performance through proactive compliance

Empower enrollment operations

Health plans face tight enrollment periods and complicated sign-up processes. Tracking member details, eligibility, and benefits can overwhelm traditional systems and manual workflows. Regulations change frequently, adding to the complexity. Health plan leaders in Managed Medicare, Medicaid, and related programs need flexible solutions that adapt to new requirements and provide real-time views into their enrollment progress.

Seamless CMS integration

Reduce costs and maintain compliance by automating member eligibility verification, correspondence, maintenance, enrollment, and election submissions to CMS.

Efficient member administration

Manage member data, elections, and correspondence with ease using automated enrollment and disenrollment processes, electronic application management, and member-initiated disenrollment.

Centralized member data

Gain a longitudinal view of patient care with centralized patient data that powers successful improvement in member operations programs.

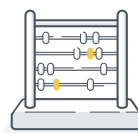

Streamline premium billing for individual and group plans

Gain a unified view of billing activities with a single, detailed source to manage billing activity for both individual and employer groups.

Flexible payment management

Manage member payments from diverse sources (SSA, lockbox, live checks) with ease, streamlining your revenue collection process.

Effortless calculations

Automate premium and dues calculations, including LEP payments and LIS management, ensuring accuracy and reducing administrative burden.

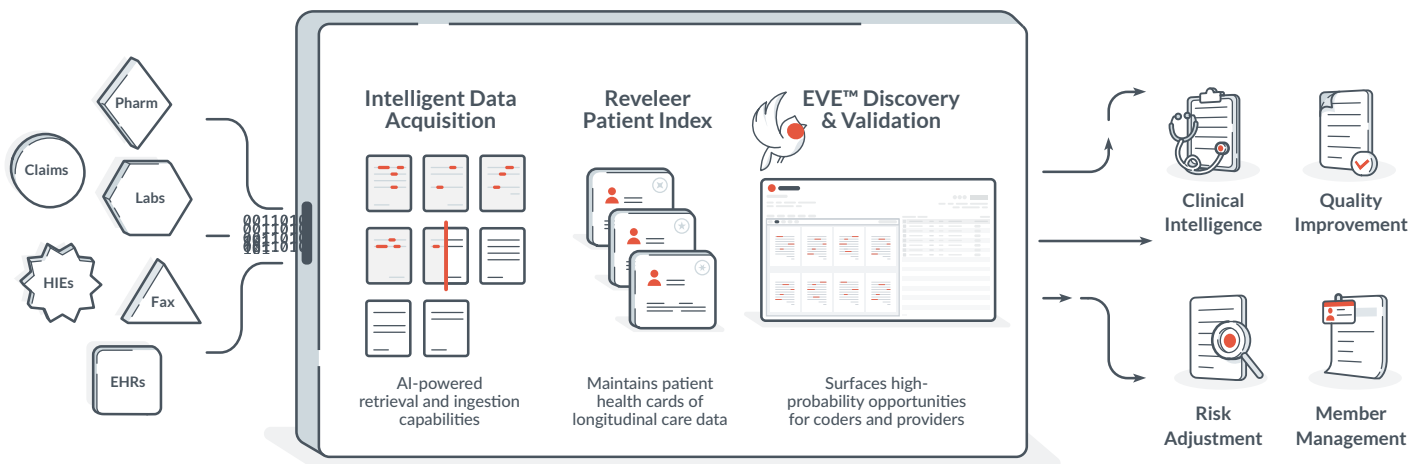

Customizable communication

Generate personalized invoices, statements, and delinquency notices to keep members informed and collections on track.

One Platform for value-based care

Reveleer's value-based care enablement platform and end-to-end solutions cut through the noise of clinical data to prioritize patient care, achieve faster, more complete results, and streamline operations from enrollment to submissions.

We help value-based care organizations improve quality of care and patient outcomes through intelligent automation and AI. Drawing on more than 15 years of innovation, Reveleer built its platform to solve the challenges health plans face every day.

Clinical Intelligence

Tap a nationwide network of clinical data to surface suspected diagnoses to providers at the point of care.

Member Management

Streamline enrollment and gain comprehensive member insights to fuel success across all value-based care programs.

Quality Improvement

Accelerate retrieval and abstraction to streamline HEDIS compliance, increase STAR ratings, and drive gap closure.

Risk Adjustment

Combine risk analytics and generative AI for fast, accurate and complete programs that improve RAF accuracy and revenue transparency.

Streamlined solutions for health plans

Reveleer's Member Management Solution centralizes member data and automates workflows for Managed Medicare, Medicaid, and related programs. By addressing siloed data and manual processes, it enhances efficiency, care coordination, and adherence.

360-Degree Member Insights

Processing over 96K pages of clinical data, the solution delivers a complete view of each member, enabling informed decisions, better care coordination, and improved experiences.

Efficient Workflows

Automating 90% of workflows with 99.8% accuracy, the solution accelerates enrollment, ensures accurate billing, reduces costs, and minimizes errors.

Financial Control & Compliance

Real-time analytics provide actionable insights to identify discrepancies, optimize cash flow, and maintain CMS compliance with transparent reporting.

Ensure attestation accuracy with Revenue Reconciliation

Improve revenue transparency with proactive compliance and attestation accuracy.

Accurate financial reporting

Reconcile member and plan data impacting earned revenue (excluding risk scores) against CMS data from the MMR, ensuring accurate financial reporting.

Proactive compliance

Identify discrepancies early on to avoid penalties, manage attestations effectively, and optimize cash flow.

Confidence in revenue calculations

Gain peace of mind knowing your revenue calculations are accurate and compliant with CMS regulations.

Ready to transform your member management?

Reveleer's Member Management Solution is built to help health plans streamline operations, improve financial control, and enhance member outcomes—all through a single platform designed for value-based care. Schedule a demo today to see how we can help your organization achieve its goals.

By using the Member Management Solution from Reveleer all of our Medicare processing and revenue reconciliation, it's all in one place. We don't have to jump around or deal with file transfers or possible errors in data pools. This streamlined approach has been a game-changer for us, enabling real-time insights and significantly improving operational efficiency"

- Member Operations Manager, Regional Health Plan

As the industry's pioneering value-based care (VBC) enablement platform, Reveleer is purpose-built to solve the most pressing real-world challenges faced by provider and health plan organizations today. By unifying retrieval, clinical intelligence, risk adjustment, quality improvement, and member management solutions into one intelligent, AI powered system, Reveleer streamlines fragmented workflows to supercharge productivity, enhance care quality, and optimize performance on high-priority value-based initiatives.
