

Retrospective Risk Solution:

AI and intelligent automation to simplify compliance and amplify results.

As value-based care risk adjustment programs increases in complexity, so does the imperative to increase its speed and accuracy for more reliable, actionable, and compliant retrospective risk reviews. Payers need a smarter, more intelligent approach to risk adjustment that seamlessly leverages large volumes of data without adding increasing coders' workloads.

Unlock productivity and improve RAF accuracy with Reveleer

Reveleer's Retrospective Risk Solution is built for Medicare Advantage, ACA, and Medicaid health plans. It empowers our customers with transparent, artificial intelligence (AI) and workflow technology that transforms clinical review with AI-powered diagnosis detection and smart recapture for unparalleled productivity and audit protection.

Our comprehensive Risk Adjustment technology improves overall

**RAF accuracy
by 33%²**

The solution accelerates retrieval success, saving on average

**1,100
hours¹**

Our AI-powered clinical review reduces coding errors and improves compliance with up to

99% accuracy*

Reveleer's intelligent automation reduces coding duration by

42.5%

* Results vary depending on configuration settings, team mix, and chart density. Reveleer expert guidance on program set up recommended.

How the Reveleer Platform transforms retrospective risk adjustment

Reveleer's next-generation Risk Adjustment solution supports Medicare Advantage, ACA, Medicaid, and other value-based care models, leveraging program-specific strategies for accurate, efficient, and compliant results.

Advanced medical record retrieval

The Reveleer Platform streamlines data acquisition and extraction with Optical Character Recognition (OCR) and Natural Language Processing (NLP) at speeds **up to 96k pages per hour**. Our technology extracts patient and provider data transforming structured and unstructured data for clinical extraction.

Highly accurate diagnosis detection

Using Reveleer's AI-powered Evidence Validation Engine, EVE™, payers realize faster, more accurate diagnosis detection, identifying potential missed diagnoses and mapping them to the right HCCs with **up to 99% accuracy**.*

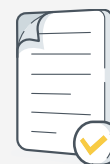

Smart Recapture

Chase prioritization and suppression, at-a-glance clinical review, and **one-click validation** transform coding workflows to minimize coding errors and improve RAF capture and compliance.

Submissions, purpose-built for compliance

Ensure data consistency, automate file processing, and quickly identify potential errors for swift resolution. Reveleer's platform facilitates timely and accurate submissions with **98% CMS acceptance rates**.

Insight-rich analytics

Empower your team to identify coding gaps, monitor project progress, and optimize your coding team's performance with Reveleer's comprehensive reporting and analytics capabilities. Gain a **full view of end-to-end program activity over time**, complete with downloadable options and performance tracking.

* Results vary depending on configuration settings, team mix, and chart density. Reveleer expert guidance on program set up recommended.

Boost productivity and maximize efficiency with Reveleer's next-generation risk adjustment

Reveleer's next generation of Retrospective Risk uses AI to automate coder workflows and HCC validation, accelerating the speed and accuracy of clinical review. Our solution helps maximize revenue capture without sacrificing compliance so coding teams can focus on charts with the greatest financial and clinical impact.

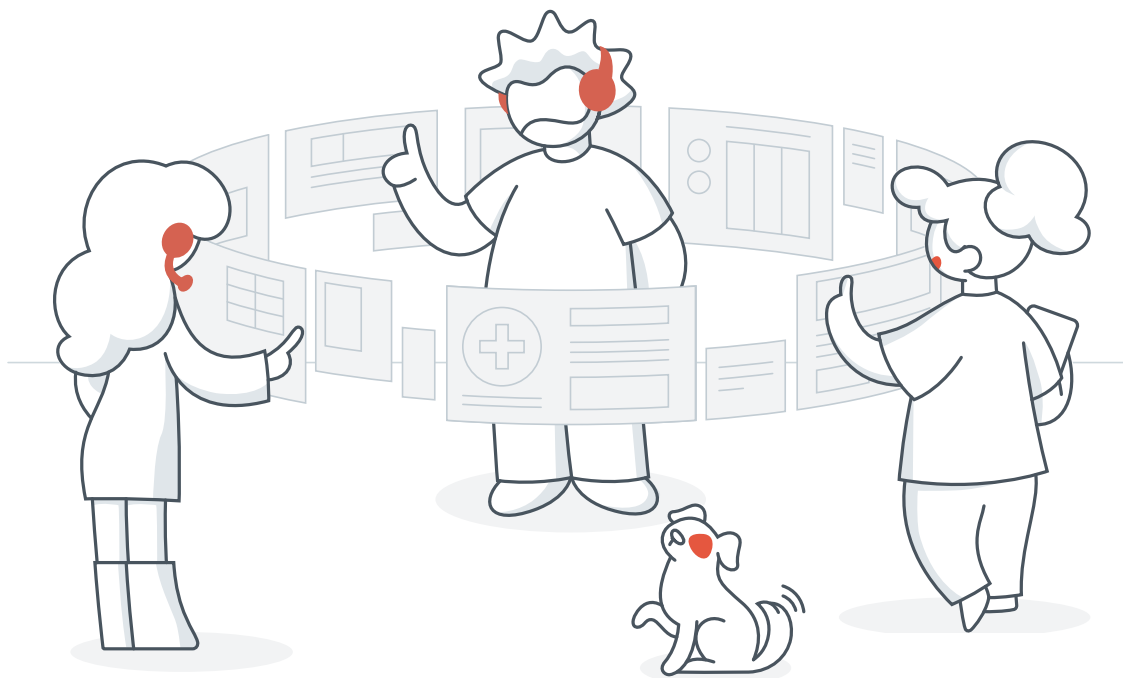

Targeted value optimization

Remove the time and resource constraints on coding teams. Reveleer uses AI and high-fidelity diagnosis detection to surface suspects that map to HCCs with at-a-glance diagnosis review and full access to supporting clinical evidence.

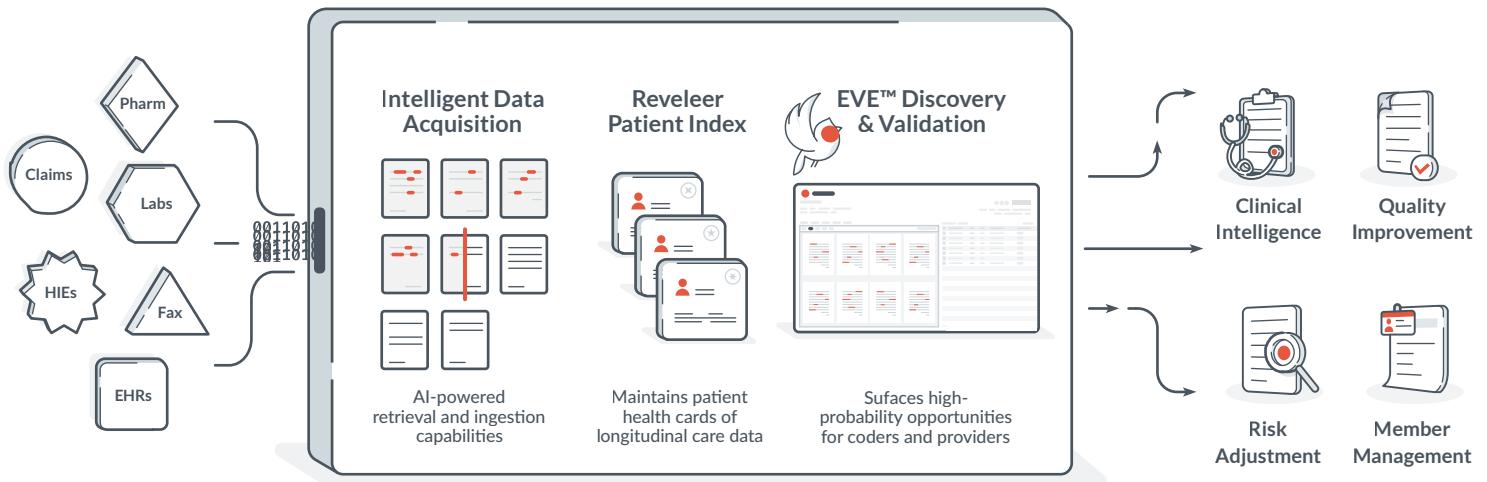

Automated clinical workflows

With chart prioritization, chart suppression, and dynamic validation, coders can target high-value charts. Reserve the most complex member charts for full clinical review to reduce errors and maximize coder time and attention.

One platform for value-based care

Reveleer's value-based care enablement platform cuts through the noise to prioritize patient care; achieve faster, more complete results; and streamline operations from enrollment through submissions. We help value-based care organizations improve the quality of care and patient outcomes through intelligent automation and AI. Drawing on more than 15 years of innovation, Reveleer built its platform to solve the challenges our customers face every day.

Key Platform Features

Keep your organization at the forefront of innovation with one platform built for value-based care. The Reveleer Platform consolidates patient data across value-based care functions eliminating the need for multiple vendors and complex systems integrations. Passionate about the intersection of healthcare and technology, we infuse our solutions with intelligent automations and AI to improve the efficiency, accuracy, and quality of care.

Intelligent data acquisition

Extracts structured and unstructured data from disparate clinical systems to deliver insights in real time.

Patient Index, a holistic view of care

A consolidated view of linked patient data mined from multiple sources and systems for a unified view of care.

Meet EVE™, our Evidence Validation Engine

Guides users to high-fidelity clinical insights leveraging evidence best practices and linked to source documentation.

Challenge

A large payer organization **struggled to meet audit deadlines** due to manual, cumbersome retrieval processes that didn't scale.

Solution

They chose Reveleer's AI-powered Risk Adjustment solution to **accelerate retrospective risk management tasks** from records processing to chart reviews.

Results

1,100 hours saved

30% faster chart review

50% more efficient provider outreach

As the industry's pioneering value-based care (VBC) enablement platform, Reveleer is purpose-built to solve the most pressing real-world challenges faced by provider and health-plan organizations today. By unifying retrieval, clinical intelligence, risk adjustment, quality improvement, and member management solutions into one intelligent, AI powered system, Reveleer streamlines fragmented workflows to supercharge productivity, enhance care quality, and optimize performance on high-priority value-based initiatives. To learn more about Reveleer's value-based care platform, visit us at Reveleer.com.
